

Monitor your adrenal health via 6 x saliva cortisol and a DIY adrenal blood test

6 x Salivary Cortisol Measurements

- Highly dependable representation of 24hr cortisol production
- More accurate cortisol plotting
- Deeper insight into adrenal health or dysfunction

6 Blood Adrenal Markers

- Combined blood and saliva testing enables better understanding of the correlation between hypothalamic, pituitary and adrenal functions
- Additional hormone and thyroid markers (DHEA-S, oestradiol, testosterone, FT4 and TSH) help to build a more complete picture of adrenal health or dysfunction
